### DETAILED ACTION

Claims 1-20 are pending in the application.

#### *Election/Restrictions*

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1 and 2, drawn to the process of preparing the compounds of formula I where m is 1.

Group II, claim(s) 1 and 2, drawn to the process of preparing the compounds of formula I where m is 2.

Group III, claim(s) 1 and 2, drawn to the process of preparing the compounds of formula I where m is 3.

Group IV, claim(s) 1 and 2, drawn to the process of preparing the compounds of formula I where m is 4.

Group V, claim(s) 1 and 2, drawn to the process of preparing the compounds of formula I where m is 5.

Group VI, claim(s) 3-20, drawn to the compounds of intermediates of formulae II, XIa, IX', IX, VIII, VII', VII, X' and X and the process of preparing the intermediate compounds of formulae II, XIa, IX', IX, VIII, VII', VII, X' and X.

The inventions listed as Groups I-V and VI do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Groups I-V are different significantly in chemical structures. They are consequently separately classified in the U.S. Patent Classification System and require separate searches in the

Art Unit: 1624

Chemical literature. None of the prior art considers these groups as functional equivalents. Each group can support a patent.

The inventions I-V and VI are related as mutually exclusive species in an intermediate-final product relationship. Distinctness is proven for claims in this relationship if the intermediate product is useful to make other than the final product (MPEP § 806.04(b), 3rd paragraph), and the species are patentably distinct (MPEP § 806.04(h)). In the instant case, the intermediate product is deemed to be useful to prepare other substituted imidazoles and the inventions are deemed patentably distinct since there is nothing on this record to show them to be obvious variants.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

**Tentative election of a single species within the elected group is further required.**

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions anticipated by the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brenda L. Coleman whose telephone number is 571-272-0665. The examiner can normally be reached on 9:30-6:00.
